

## MARBLE MAINTENANCE

Our marbles are of natural stone and therefore have tones and veins that can vary, which make each piece unique and unimitable.

Each top is treated with silicon wax which is water repellent, that with time loses its effectiveness, for this reason we advise to repeat the process with wax for marble that you can easily find in a hardware store.

Active and quick maintenance is fundamental for maintaining the integrity of the marble which is a live and natural product that has the tendency to absorb all substances with which it comes into contact with.

For normal cleaning it will be sufficient to pass the surface with water and a neutral detergent or alcohol, ensure not to use detergents that are too aggressive (very high or very low Ph), and in particular to remember to dry immediately the top with a clean cotton cloth.

Avoid exposing the surface to chemical substances or solvents, in particular those for paints, that contain trichloroethylene or Methylene chloride, solvents for nails, ammonia or detergents that contain ammonia, brighteners, indelible pens or ink, oily soap, coffee, wine, oil or residues of food, like lemon or tomatoes.

If the tops were to come into contact with any of these substances wash immediately with plenty of water
