

CERAMIC MAINTENANCE

Ceramic tops do not require any particular maintenance, thanks to the high resistance and stability of the material.

Cleaning can be carried out very simply using soft and clean cloths soaked in water, possibly adding detergents of common household use with neutral pH or natural vinegar.

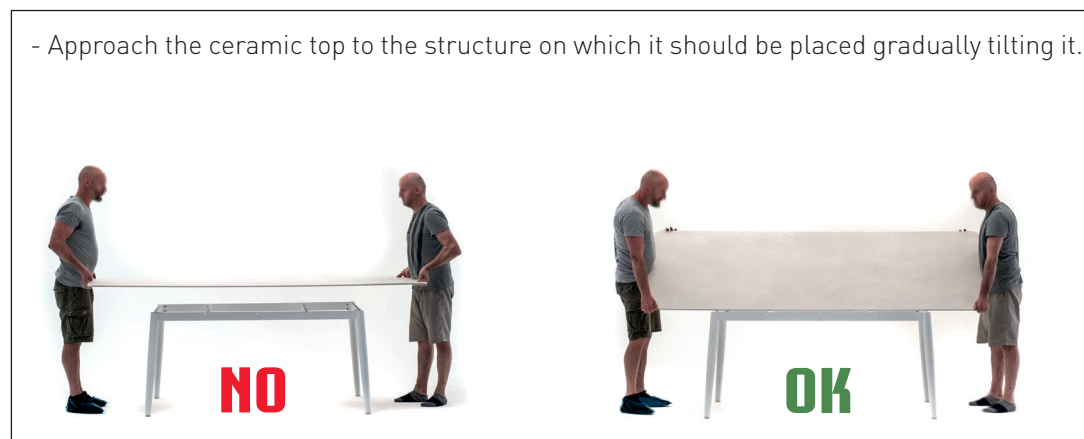

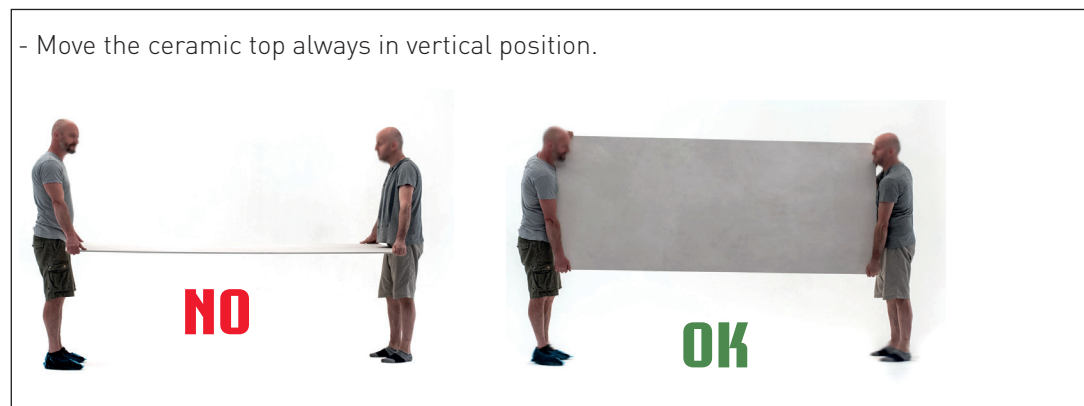

Dry the surface after cleaning is complete. Do not use metal or abrasive brushes. The use of products containing waxes, brighteners, strong acids (eg hydrofluoric, sulfuric, etc.) is not recommended because they could permanently damage the surface.

SPECIFIC STAINS CLEANING - NATURAL AND BUSH-HAMMERED SURFACES

Clean stains immediately without letting them dry. Before the application of any cleaning product, do a test in a not visible area to check if any halo or color variation will arise.

| TYPE OF STAIN | FIRST OPERATION | SECOND OPERATION |
|---|---|---------------------------------|
| Cement, limestone, metal scratch, rust. | Clean with water as soon as possible, softly rubblig with a cloth | Fila Deterdeck, cement descaler |
| Grease, food, rubber, dye, marking pen, blood, etc. | Clean with water as soon as possible, gently rubblig with a cloth | Fila PS87 |
| Graffiti, varnish, paint | Clean with water as soon as possible, gently rubblig with a cloth | Fila NoPaint Star, solvent |
| Coffee, tea, juice, soda | Clean with water as soon as possible, gently rubblig with a cloth | Fila NoPaint Star, solvent |
| Candle wax or wax for scratch repairs, tree resin or adhesive tape traces | Clean with water as soon as possible, gently rubblig with a cloth | Filasolv, solvent |
| Silicone sealant | Clean with water as soon as possible, gently rubblig with a cloth | Fila Zero Sil, acetone |

ATTENTION - CERAMIC TOPS REQUIRE SOME PREVENTIVE MEASURES:

- Pay particular attention during handling: it is always necessary to wear anti-cut work gloves to avoid possible accidental injuries due to the breaking of the piece
- If the customer needs to install a top support frame: mount the frame before moving the top
- Always position the table horizontally.
