

## POLYPROPYLENE (PP) FEATURES

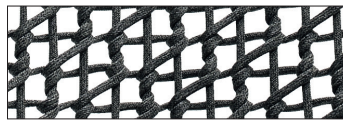

Polypropylene (PP), used by Varaschin SpA, is a recyclable thermoplastic polymer, with the following technical features:

- Excellent tensile strength and elongation resistance: Test ISO 1421/2017.
- Excellent resistance to light and outdoor environments: UV tests performed according to the standards:
  - ISO 105-X12
  - ISO 105-B04
  - ASTM G53-96
- Excellent response to pilling according to the norm ISO 12945-2.

## POLYPROPYLENE (PP) MAINTENANCE AND CLEANING RECOMMENDATIONS

- Do not use solvents or alkaline detergents which could damage the strings. Avoid chemical detergents, aggressive solvents, rigid brushes and high pressure water, this in order not to deteriorate the surface of the rope itself.

N.B. : NEVER SCRATCH / SCRAPE THE SURFACE OF THE ROPES

FASE - PHASE 1

- Remove the dirt on the surface by washing with water, use non-aggressive detergent products with the help of sponges and / or soft rags.

FASE - PHASE 2

- Rinse thoroughly until all detergent or soap residues are completely eliminated. If the dirt persists, repeat the operation.

FASE - PHASE 3

- Dry with a dry cloth. Do not dry with hot air.
